

Community Volunteers and Financial Assistance

Assistance from parents and other community volunteers has always been and will continue to be encouraged where this is used to improve educational services to pupils.

Volunteers will be accepted to assist or implement the work of regular staff members at the discretion of and under the direction of the local school administrator after consultation with appropriate staff.

Any community group may provide programs additional or supplemental to the regular school program during or outside of school hours with the consent of and under the direction of the local school administrator so long as these programs are compatible with:

1. The regular course of study.
2. Policy determinations of the Board of Education.
3. System-wide administrative procedures of the Superintendent.
4. Guidelines for community use of school building on a permit basis.
5. Collective Bargaining Agreements.

Contributions to the General Fund of the school system will be accepted for use in supporting existing or approved programs, providing that any contributions earmarked for special purposes in individual schools be subject to the compatibility conditions in paragraph three above.
