

School District Goal Setting and Planning

The Mission Statement of the Cincinnati Public Schools, adopted by the Board of Education, sets forth the educational philosophy of the Cincinnati Public Schools. All goal setting activities of the school district shall be derived from and guided by the Mission Statement.

The superintendent will determine a process by which to obtain broad community/school input to identify needs and educational concerns leading to proposed goals. Based on these needs and concerns and guided by the Mission Statement, multiple year goals will be developed. The district-wide goals approved by the Board of Education will serve as the basis for development of objectives by each school and central office throughout the district.
