

Too Sick for School

Guidelines for Keeping Students Home from School Due to Illness

Keep your child home from school if:

1. If your child has had one of the below symptoms, we request they be free of those symptoms for at least 24 hours without the use of medications before they return.
 - a. Temperature of 100.4 or higher
 - b. Vomiting
 - c. Diarrhea
2. If your child has a respiratory illness, it's important to have them evaluated for flu and COVID-19.
3. If your child has symptoms of a fever, sore throat, nausea or vomiting, or difficulty swallowing food or water, it is recommended your child be evaluated for strep throat. Treating strep can reduce your child's duration of illness, relieve symptoms and prevent complications. If your child is being treated for strep throat, we request your child be on antibiotics for 24 hours and bring a note from a provider before coming back to school.
4. If your child is diagnosed with ringworm, scabies, pink eye, or other highly contagious illness, we recommend consulting with the student's medical provider for return to school guidance.

Communicable Diseases

The school may send a student home if it appears that they may have a contagious illness. The parent may be asked to provide a doctor's note indicating the symptoms have been evaluated before the student is allowed to return to school. The Ohio Department of Health Communicable Disease Chart serves as the guidelines for determining recommendations for the student. Please refer to the Cincinnati Public Schools Communicable Disease Response Plan for more information.

In some instances, the Guidelines for Keeping Students Home listed above are modified to prevent or contain an illness outbreak in a school.

Please call your doctor or school nurse if you have any questions or concerns, or if your child does not seem to be getting better.

GOOD HAND-WASHING PREVENTS THE SPREAD OF ILLNESS
